Britta

Please see the attached court decision. In summary - as part of a lawsuit that I did not bring, and stated repeatedly that I never intended to bring in formal correspondence that is in your possession already, and was not even allowed to bring against the German government by Nigger-Net people at Deutsche Post who artificially delayed my mail - I have been told that I must bear the court costs, whatever they are. Isn't that incredible?

Thereafter, there are many, many, pages of totally erroneous language about my asylum case, on which the Verwaltungsgericht of Stuttgart cannot issue a decision at this time, nor issue a deportation order, because there are no grounds to deport under Dublin procedure and the second asylum interview has still not occurred. Criminals continue to use the Verwaltungsgericht of Stuttgart and the Landratsamt of Schwäbisch Hall to produce legally invalid correspondence on formal government letterhead.

I don't know what to do with this any longer. I will follow up with physicians, as was implied I should do (though not formally directed) in the letter issued on 14 February along with my new identification document (Duldung), in support of the issuance of a medical deportation ban - something that the Verwaltungsgericht of Stuttgart cannot rule on as part of the scope of this lawsuit against the German government that I never filed.

Sadly, what you are turning into in Germany is a rubber-stamp for a Jewish organized crime ring, and nothing more. I am certain that this is geographically limited to Baden-Württemberg, of course, which I assume is the reason why I have been assigned here.

One final item of note is that the opinion of the Stuttgart verwaltungsgericht states that conditions in Germany for legitimate asylum applicants like myself are deemed inhumane. I found this amusing, as part of the overall mountain of bogus case law that is now being generated in the Anglo world in response to the matter of my asylum case. While I do view the way I was treated in Germany as totally inhumane, the fact that this poor treatment was merely a matter of Jewish-American corruption adds a new and interesting layer to the juridical precedent that the trash in Stuttgart are attempting to construct. Your country is throwing itself away for a pitiful, tiny amount of money.

James W. Meng
