Please see the below message. I was illegally deported at gunpoint from Germany yesterday morning. It is possible that in the near future I will have to meet with your colleagues in Bern again in order to find a solution because every other country I have dealt with seems to be totally incompetent to handle a real and serious asylum case.

Please see the below message. I was illegally deported at gunpoint in the early hours of the morning by the German police. Many of my personal items were stolen in the process and I have not been given any further instructions about where to go in Belgium, nor do I have any money for a train ticket, nor was I offered any place to stay. I have asked relatives to send money so I can visit the commissariat for migration in Brussels.

I was illegally deported from Germany early this morning. They have dumped me off in Eupen, Belgium, with no further arrangements. I have no money and am asking relatives for help. I desperately need to know if you can represent me or if you think your country can accept my asylum case. I will call you as soon as I am able, but for the moment all of my SIM cards are out of money and my Google Voice account is being blocked.

Good morning -

I normally write you from my European account, mengjames44@gmail.com, but today I thought I would attempt to forward my latest complaint to the German asylum
